Carbon Steel Press Fittings for Gas Adapters

Press x FNPT, Press x MNPT, Press x Fitting

A.Y. McDonald Mfg. Co. Carbon Steel Press Fittings can be applied to Schedule 10 to 40 steel pipes meeting ASTM A53, A106, A135, and A795 standards and are compatible with a wide range of approved applications, including natural gas and propane. These fittings can be installed and connected with most of carbon steel pipes in residential, commercial, and industrial systems. This press system does not require gas shielded welding, brazing, and threading, so there is no fire hazard. Therefore, connecting gas pipe can be done safely and quickly.

SUBMITTAL INFORMATION

- HNBR sealing element for fuels and gases
- Available sizes ranging from 1/2" to 2" in diameter
- Configurations include elbows, couplings, repair couplings (no stop), extended couplings (no stop), reducers, tees, adapters, unions, and caps
- Zinc nickel alloy coating with stronger corrosion-resistance
- Leak technology - a significant leakage will be identified at an unpressed fitting during the low pressure testing of the piping system
- The carbon steel press fittings are compatible RIDGID® (RP Series) and Milwaukee® (M18™) standard jaws

1. The system must contain sufficient condensate drain.
2. The ambient temperature should be regarded as a normal working condition and should not exceed the limit of the sealing ring.
3. Complies with CSA 6.32/ANSI LC-4.
